

Acoustics events across Brazil and around the world (2025–2029)

This section brings together some of the important events, congresses, and technical meetings related to acoustics, noise, vibrations, audio, signal processing, and related fields, scheduled for the period 2025–2029. For each item, the date, location, and official website address are provided whenever available.

The selection was compiled from calendars and announcements by leading associations and societies, such as ICA, I-INCE, ASA, AES, IIAV, EAA, ISMIR, and FIA, among others, as well as by national and regional entities, with the aim of offering a broad overview that includes both major international conferences and regionally focused meetings. Events held in Brazil are highlighted with a yellow star. Finally, Figure 1 presents consolidated statistics for the set of listed events.
